MenABCWY (see note #1)	Penbraya (Pfizer); Penmenvy (GSK)

How to Complete this Record

- 1. For hepatitis B and meningococcal B vaccines (MenB or MenABCWY), record the trade name (see table at left); for all other vaccines, record the standard abbreviation (e.g., Tdap).
- 2. Record the funding source of the vaccine given as either F (federal), S (state), or P (private).
- 3. Record the route by which the vaccine was given as either intramuscular (IM), subcutaneous (Subcut), or intranasal (NAS), and also the site where it was administered as either RA (right arm), LA (left arm), RT (right thigh), or LT (left thigh).
- 4. Record the publication date of each VIS as well as the date the VIS is given to the patient.
- 5. To meet the space constraints of this form and federal requirements for documentation, a healthcare setting should keep a reference list of vaccinators that includes their initials and titles.
- 6. For combination vaccines, fill in a row for each antigen in the combination.
